Nationwide, on June 8th cities around the United States and the Caribbean, Health Departments and Organization Leadership will sponsor diverse activities to create awareness of the state of HIV/AIDS and the health status of Caribbean-Americans in their specific communities. **National Caribbean American HIV/AIDS Awareness Day** is a nationwide mobilization effort designed to encourage Caribbean communities across the United States and the Caribbean to get educated, get tested, get treated and get involved with HIV/AIDS, as it continues to devastate racial and ethnic minority communities.
